William Kristiansen

ABOUT

Front End developer with three years experience working with React.js frameworks including redux. Open to communication and collaboration in an office or remote environment. Loves the industry and the technology and is excited to learn as much as possible.

EXPERIENCE

LuckBRC, Remote — *Front End Developer*

December 2021 – February 2022

- Created a front end application for a Bitcoin startup.
- Created a chat app using a golang backend API which pairs the user's wallet address with a username in a database

ManifestDAO, Remote — *Front End Developer*

February 2022 – June 2022 (Contract)

- Created several front end components for smart contracts using React
- Created an inventory system for keeping track of users' Manifest NFTs
- Worked remotely with a team of developers to deliver a successful product

Singularity, Remote — *Front End Developer*

March 2022 (Contract)

- Created two creative Front-End Frameworks for NFT Minting using React and vanilla JS
- Utilized Web3 Tech with artistic flair to create unique minting experiences for the user
- Worked remotely with a global team of developers to deliver a product by the deadline

AmbrosiaDAO, Remote — *Founder/Front End Developer*

December 2021 – February 2022

- Founded AmbrosiaDAO, a fork of OlympusDAO, with one other developer
- Created Front End frameworks using React to help users buy tokens during a presale and use the DAO functionalities

SKILLS

- React with Typescript and Redux
- AWS & DigitalOcean
- MongoDB
- Golang
